

I started at Tamarack when it first opened in 1996 as a Kindergartner. Now all of these years later, I am still at Tamarack, but as a staff member. It has been quite a journey, but it seems right that I would end up here. The environment is nurturing, creative and all over supportive of the people in its community. I enjoy bringing this same passion to my work with the students as a Handwork Assistant and as Before/Aftercare Teacher. Not only are the children learning a variety of skills and knowledge, ones that I appreciate having as an adult now, but I believe that being a part of Tamarack is always a learning and growing experience for everyone in the community. A lot has changed since my time as a student, but I am grateful to be back and be a part of the new generation Tamarack. This school and this community has been my past, it is my present, and I hope it will continue to be my future.
